

**Certified in Risk and Information Systems Control
(CRISC)**

Course Syllabus

Index

Domain 1: IT Risk Identification

Domain 2: IT Risk Assessment

Domain 3: Risk Response and Mitigation

Domain 4: Risk and Control Monitoring and Reporting

Course Curriculum:

Domain 1: IT Risk Identification

- Learn to collect an organization's information and data to identify present or potential risks, threats, and vulnerabilities.
- Learn how to determine the potential impact of risks to an organization, who the stakeholders are, and the business risk tolerance.

Domain 2: IT Risk Assessment

- Learn how to create an efficient security assessment program.
- Learn how to test current controls and communicate the assessment results to management and other stakeholders.

Domain 3: Risk Response and Mitigation

- Learn how to develop and implement effective risk responses
- Learn how to document controls and procedures, update risk registers, and ensure that all established risk control policies are followed.

Domain 4: Risk and Control Monitoring and Reporting

- Learn all the skills required to monitor both the IT risks and the controls put in place.
- Learn about risk management strategy and how it supports business objectives.
